Art
Photography
Music
Running
Swimming
Travelling

Education

BSc (hons) Chemistry, First Class Honours

University of Bristol, England

A-levels
Grade A in Fine Art, Maths, French, Geography.
Grade A* in Chemistry.

Freelance work (Nov 2015–present)

I have worked with my clients on projects spanning multiple disciplines, consistently fulfilling each brief to the highest standard. Through managing whole projects I have demonstrated strong communication skills, creative problem solving, and prompt maintenance and troubleshooting support.

Specific to design, I am confident in conducting research across a wide range of sources and media, exploring new and exciting trends. Through creating mood boards and preliminary sketches, wireframes or prototypes, I am able to craft comprehensive design languages and translate them into pixel-perfect vector graphics and layouts. Having a sound knowledge of key concepts such as colour theory, grids, and visual balance has ensured professional yet fresh results.

Developing mobile-first, responsive websites has given me extensive experience in optimising websites for all mobile and desktop devices and all major browsers. Conforming to W3C standards and developing with accessibility at the forefront, I have become fluent in coding best practices, taking advantage of CMSes, javascript, and relevant libraries to create rich, engaging experiences.
